Subject: SaniSure Products from Sani-Tech West, Incorporated

The purpose of this letter is to clarify the relationship with SaniSure Inc. and briefly explain how Sani-Tech West is going to market with the SaniSure products as it relates to the assemblies and components being supplied. SaniSure is a wholly-owned subsidiary of Sani-Tech West, Incorporated, established to design and manufacture unique products for the single use markets.

Sani-Tech West has also elected to brand their single-use assemblies under the name of SaniSure. However, all Quality Systems, equipment, procurement of components and product, facilities, and employees are furnished, fabricated and/or manufactured by Sani-Tech West. Assemblies will be labeled with the SaniSure logo; all assembly certifications will be written and maintained as SaniSure. This is a marketing strategy only and has no material impact on the products.

Both SaniSure and Sani-Tech West operations are currently being conducted at 1020 Flynn Rd., Camarillo, CA 93012. However, recently the company opened an additional facility located at 1230 Calle Suerte in Camarillo. The purpose of this new facility was to expand the cleanroom operational capacity as the new cleanroom provides approximately 3X times more work space. The new ISO 7 cleanroom been validated and is currently in use for various customers who have approved the new site.

If you have any further questions, please feel free to contact me at 805-465-5614.

Sincerely,

A handwritten signature in black ink, appearing to read "Vincent Pimentel".
