Subject: Animal Origin Content Statement for SaniSure™ Clamps

An additive for the polymer products listed below may contain a minor quantity of a component derived from bovine sources. Our supplier has stated that their additive is derived from raw material purchased from countries where the occurrence of BSE is relatively small.

Additionally, the raw material is subjected to rigorous processes of hydrolysis and distillation, as well as hydrogenation for some of the products. The operating temperatures are over 450 F which exceeds the processing condition criteria guidelines recommended to prevent transmission of BSE by the EU Scientific Steering Committee and other regulatory bodies.
